

VEERAKRAN SEREERUNGRUANGKUL

Backend Developer | Platform & Systems Integration | Cloud & Live-Service Games

veerakran.s@gmail.com | Chonburi, Thailand | [linkedin.com/in/veerakran-s](https://www.linkedin.com/in/veerakran-s)

PROFESSIONAL SUMMARY

Backend Developer with 7+ years of experience building enterprise software and backend systems for live-service games. Experienced in developing APIs, designing databases, and integrating cloud services, multiplayer platforms, payment systems, specialized hardware, and third-party APIs. Known for quickly learning unfamiliar technologies and delivering production software for commercial products, government agencies, and public-sector organizations.

WORK EXPERIENCE

BACKEND DEVELOPER | Hengtech Co., Ltd., Sri Racha, Chonburi, Thailand OCT 2021 – MAY 2026

- Built backend services and REST APIs for the Tiny Little platform supporting seven commercial games.
- Designed backend architecture supporting shared player services across the Tiny Little platform.
- Developed gameplay features and backend functionality across four Tiny Little game titles, including Royale, Gangz, Deva, and Fly.
- Integrated Photon Realtime, PlayFab, Xsolla, Agora, and AdMob into commercial game projects.
- Managed deployment of seven browser games and two mobile titles on Google Play and the Apple App Store.
- Deployed and maintained backend services using Firebase, Cloud Run, Heroku, Coolify, and Netlify.
- Managed GitHub workflows and technical documentation.
- Improved development workflow using AI-assisted tools and local LLMs for implementation, debugging, and refactoring.

SOFTWARE PROGRAMMER | Wewasanad Co., Ltd., Phaya Thai, Bangkok, Thailand JUN 2018 – SEP 2021

- Developed enterprise software for private-sector clients, government agencies, and public organizations using C#, ASP.NET MVC, PHP, and Node.js.
- Modernized TK Park's workstation, access control, POS, and kiosk systems.
- Developed Windows applications integrating Thai Citizen ID smart card readers, barcode scanners, RFID devices, and digital signature pads.
- Built backend services and frontend integrations for government information systems, including the Central Institute of Forensic Science (CIFS) and the Public Debt Management Office (PDMO).
- Developed LINE chatbot solutions and customized enterprise applications based on client requirements.
- Designed and maintained Microsoft SQL Server and Oracle databases.
- Built Windows and web utility applications integrating enterprise software with specialized hardware.

EDUCATION

Bachelor of Science, Information Technology and Communication
Sripatum University, Chonburi Campus | 2018

SKILLS

Technical Skills

- **Programming Languages:** TypeScript, JavaScript, C#, PHP, SQL, Dart
- **Backend:** Node.js, NestJS, Firebase Functions, ASP.NET MVC, Slim Framework, REST APIs
- **Frontend:** HTML, CSS, XAML, WPF, Bootstrap, Flutter, Electron

VEERAKRAN SERERRUNGRUANGKUL

- **Databases:** Firestore, Firebase Realtime Database, SQLite, Microsoft SQL Server, Oracle Database
- **ORM:** Entity Framework, Prisma
- **Cloud Platforms:** Firebase, Cloud Run, Heroku, Coolify, Netlify
- **Game Services:** Photon Realtime, Azure PlayFab, Colyseus, Xsolla, Agora, Google AdMob, ironSource
- **Developer Tools:** Git, GitHub, GitKraken, Notion
- **AI-assisted Development:** Claude Code, Codex, LM Studio, OpenCode, Antigravity, Zoo Code
- **Hardware Integration:** RFID devices, smart card readers (CCID), barcode scanners

Languages

- English (Professional Working Proficiency)
- Thai (Native)

SELECTED PROJECTS

Tiny Little Platform

Shared backend platform supporting seven commercial games across web, Android, and iOS.

- Designed shared APIs and database structures for player accounts, cloud saves, progression, and online services.
- Supported unified deployments across browser, Android, and iOS.

WeLearn Pro

Enterprise learning platform adapted to client-specific requirements.

- Co-designed backend architecture.
- Implemented video learning features including progress tracking, HLS streaming, YouTube playback, AFK detection, and in-video quizzes.

RentPilot

Commercial offline dormitory management system for Windows.

- Built an offline Windows dorm management system using Electron, React, Prisma, and SQLite with OneDrive backup support.
- Deployed to production and currently maintain the application for an active client.

Government & Public Sector Solutions

Enterprise solutions for government agencies and public-sector organizations.

- Modernized TK Park's workstation management, RFID access control, POS integration, and kiosk systems.
- Developed internal workflow systems and backend integrations for clients including the Central Institute of Forensic Science and the Public Debt Management Office.
- Developed public-facing applications, including U-NAI, providing information on missing persons and unidentified bodies.
